

AHSAN ILAHI

Full-Stack Website Developer

0325-7402671 | ahsanilahi865@gmail.com | linkedin.com/in/ahsanilahi0

PROFESSIONAL SUMMARY

Full-stack developer with experience in building web applications using MERN stack and React. Skilled in frontend development, backend API integration, database design, and real-time communication systems using WebSockets.

EXPERIENCE

ViralSquare

Jan 2026 - Present

Developed and maintained reusable React components for a full-stack web application as part of a MERN stack team. Contributed to backend development with Node.js and Express, building and integrating REST API endpoints. Worked with MongoDB for data storage and retrieval, supporting end-to-end feature delivery across the stack. Collaborated with engineers using a Git-based workflow to debug issues and ship full-stack features.

TECHNICAL SKILLS

Languages: C, C++, JavaScript, Python

Frontend: React, TailwindCSS

Backend: Node.js, Express

Databases: MongoDB, SQL Server

Tools & Platforms: Git, GitHub, VS Code, Nodemon, Windows, Linux

Core Competencies: REST API Development, Data Structures & Algorithms (Fundamentals), Debugging & Troubleshooting, UI/UX Fundamentals, Git Collaboration Workflow

EDUCATION

Lahore Garrison University

2022 – 2026

Bachelor of Science in Computer Science (BSCS) - CGPA: 3.2 / 4.0

PROJECTS

Moseeqify - Music Streaming Web Application (Team Project) [\(Link\)](#)

Tech Stack: React, Flask, Firebase, SQL Server

- Built a full-stack music streaming platform with authentication, music browsing, playlists, and audio playback.
- Developed React components for login/signup, dashboard, album view, song details, playlists, search, and the music player.
- Integrated the Flask backend for API communication and database connectivity.
- Designed the SQL Server schema for users, songs, albums, and playlists.

Real-Time Chat Application (MERN Stack) [\(Link\)](#)

Tech Stack: React, Node.js, Express, MongoDB, WebSockets

- Built a real-time chat application with user authentication and instant messaging over WebSockets.
- Developed reusable React components, including the chat interface, sidebar, message list, and user panel.
- Built REST APIs with Node.js and Express for authentication and user management.
- Designed the MongoDB schema for users, messages, and timestamps to support reliable message tracking.
